Proxy Server Configuration for OS X
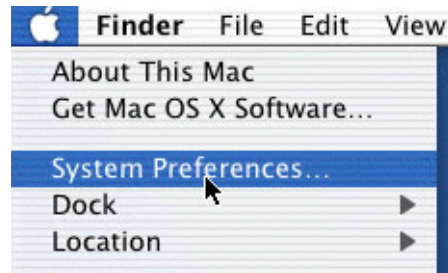

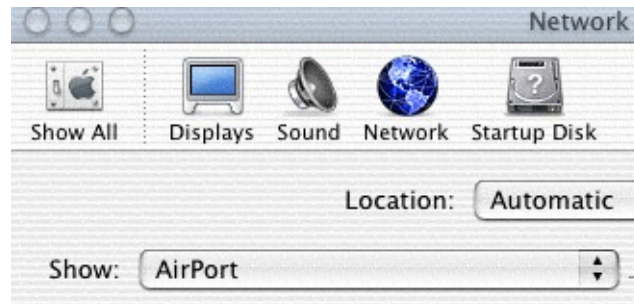

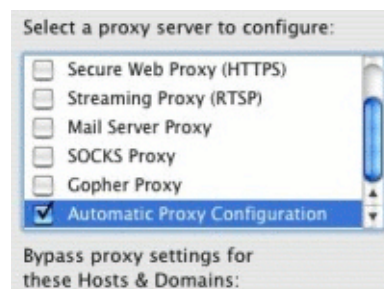

1. Click on the Apple Menu on the top of your screen.
2. Click System Preferences. The System Preferences window opens.

3. Under the heading Internet & Network, click the Network icon. The Network window opens.
4. In the Show field, select AirPort from the drop down menu.

5. Click the TCP/IP tab.
6. In the Configure field, select Using DHCP from the drop down menu.
7. Click the Proxies tab.
8. Under the Select a proxy server to configure heading, click the Automatic Proxy Configuration checkbox.

9. In the URL field on the right side, type:

http://sisig.ateneo.net/browser.pac

10. Click Apply Now.
